

SHETLAND DIRECTORY 2025-26

NEW FOR THE 2025-26 ONLINE EDITION – SHETLAND SUPPLIERS DATABASE

A new section of the online Shetland Directory will list local businesses who are interested in liaising with visiting contractors in a range of disciplines including: *Oil & Gas – Renewables – Engineering – Construction – Plant Hire – Haulage – Marine etc*

The database is not limited to these industries, and if you think your business should/could be added please email us with more details.

All businesses choosing this enhanced 'database' option will appear in both the **Shetland Suppliers Database** AND the Commercial Directory and will also appear randomly on the Directory home page as a 'Featured Enhanced Listing'.

The **Shetland Suppliers Database** will also have its own category in the online Directory, meaning those searching for sub-contractors etc can find your listing more easily (businesses will be listed alphabetically here).

If you choose this enhanced option, we'll upload the relevant extra details to your Directory listing for you.

You'll need to email us good copies/images of any relevant

- company and industry membership logos
- photographs (up to 12)

We'll also need

- a text description (about your business and your main products/services etc)
- contact names
- social media links
- location map co-ordinates

Your **Shetland Suppliers Database** listing will be online for the life of the 2025-26 Directory (approx. two years).

Visit directory.shetlandtimes.co.uk to book your Enhanced Listing (**choose Option A**), then **email your extra information, images, logos etc to** directory@shetlandtimes.co.uk and we'll do the rest.

(A general enhanced listing option is also available. Choose 'Option B' when booking at directory.shetland.co.uk, then upload the extra information yourself. These listings won't appear in the Shetland Suppliers Database.)
